Madhan M

CAREER OBJECTIVE

Passionate and quick-learning fresher with a strong interest in frontend and software development. Skilled in building responsive web interfaces and writing clean, efficient code. Eager to contribute to real-world projects and grow as a developer in a dynamic team environment.

EDUCATION

Vels Institute of science, Technology and Advanced Studies

2020 - 2024

Bachelor in Information Technology

EXPERIENCE

Web Developer Intern – Uni Britind Global Pvt Ltd (Subsidiary of Ernestwell Business Solutions)

Nov 2024 – Feb 2025 | Remote

Tech Stack: React.js, HTML5, CSS3, JavaScript, Firebase, Git, React Router, Axios

- Developed and maintained both front-end and back-end features for full-stack applications, ensuring clean and scalable code structures.
- Designed and implemented responsive user interfaces and websites, aligning with modern UI/UX principles and accessibility standards.
- Implemented React Router for efficient navigation and built reusable components with hooks (useState, useEffect) to streamline application state management.
- Collaborated in Agile sprints, participated in code reviews, testing, and resolved bugs in coordination with cross-functional teams.

PROJECT

Live Weather

HTML5 | CSS3 | JavaScript | OpenWeather API | GeoLocation API

- Built a responsive website using HTML5, CSS3, and JavaScript to provide live weather data.
- Integrated OpenWeather API to fetch and display weather data for any location based on user input.
- Implemented GeoLocation API to automatically retrieve and present weather data for the user's current location.
- Ensured a user-friendly interface with dynamic updates for temperature, humidity, and other key weather parameters.
- Enhanced user experience by adding responsive design for compatibility across various devices.

Personal Portfolio

React.js | HTML5 | CSS3

• Built a fully responsive personal portfolio website to show my skill sets, works, projects and my professional journey in a special and interactive way for Hiring Managers and Recruiters.

TECHNICAL SKILLS

- Programming Language: Java
- Web Technologies: HTML, CSS, JS, JQuery, React JS, Web Performance, Responsive Design, Javascript Component Libraries, Accessibility
- Backend & Database: MySQL, Firebase (for integration)
- Tools: Git, GitHub, VS Code, Canva, Netlify
- Communication Tools: Microsoft Teams, Zoom, Jira
- Additional Expertise: Linux Desktop Technologies, Open Source Contributions, Curiosity about Technology

CERTIFICATE

- **SQL** and **Relational Databases 101**: powered by IBM Developer Skills Network.
- Fundamentals of Javascript: powered by IBM Developer Skills Network.
- Create Table and Load Data in MYSQL using phpMyAdmin: powered by IBM Developer Skill Network.
- Software Engineer Job Simulation: Accenture Nordics's Software Engineering on Forage.
